

# PORTFOLIO REVAMP

# SITE OBSERVATION

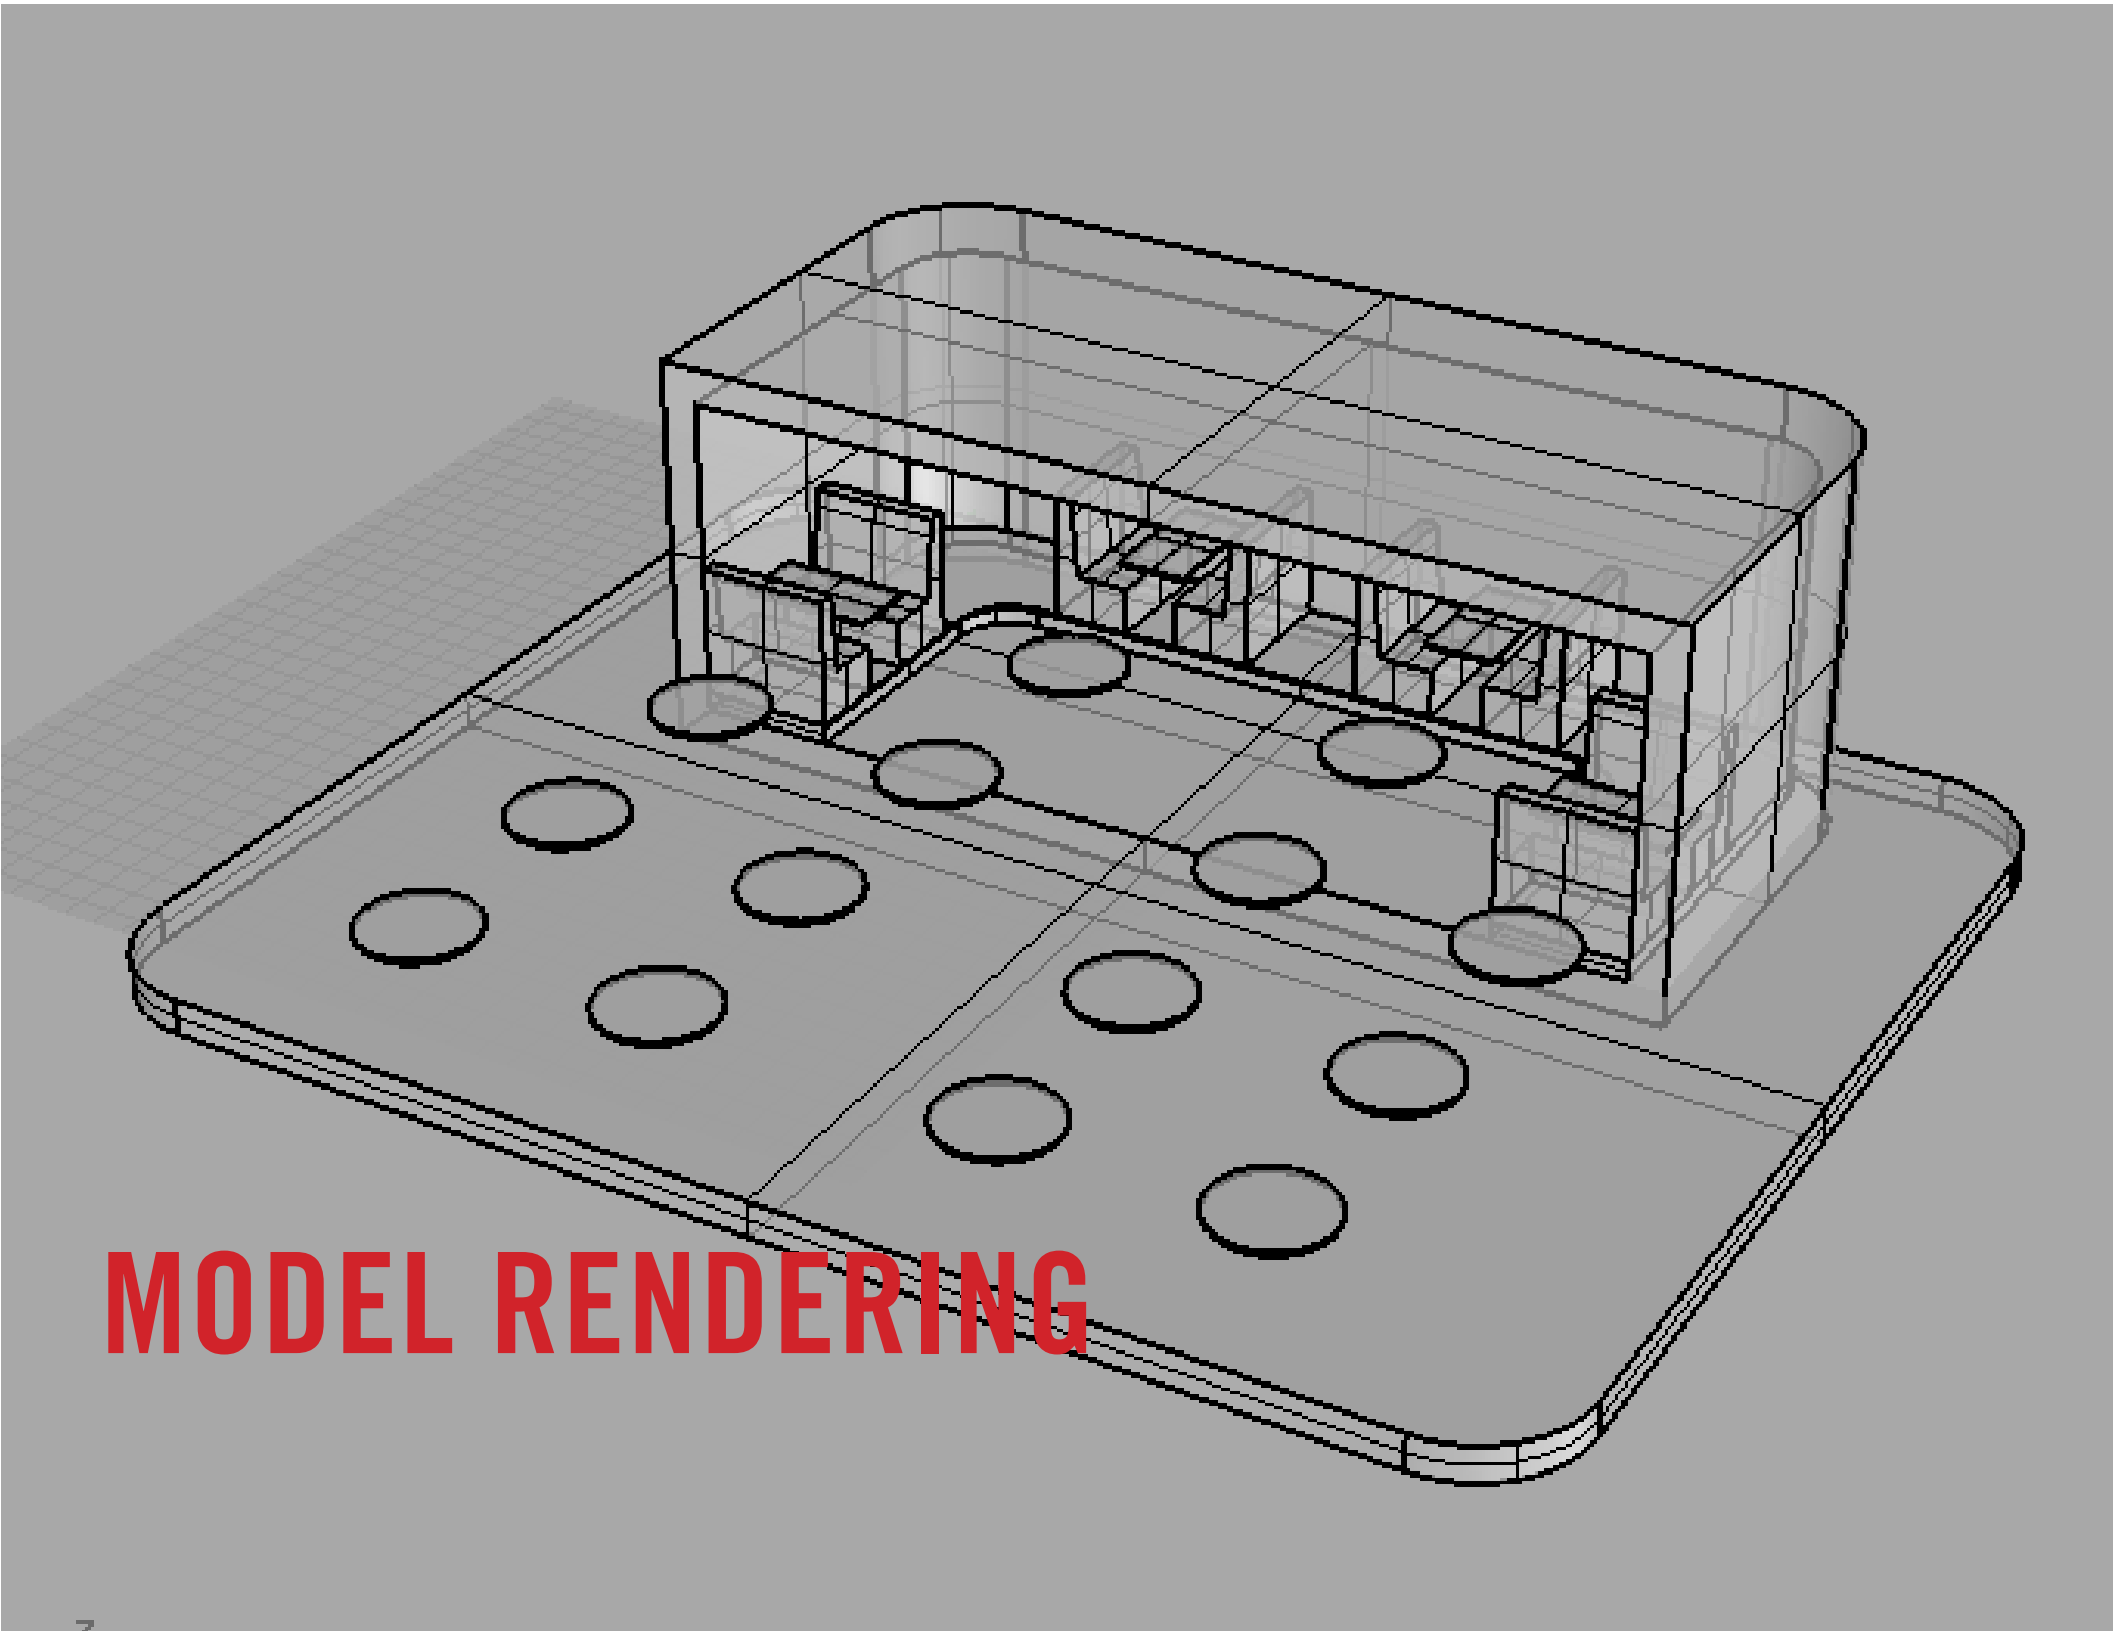

- I. Traffic: either too few or too many people.
- II. Noise Level: extremely high noise level, echoing sound.
- III. Hive-like Space: aesthetically segregated from the rest of the open plan space.

# PROPOSAL

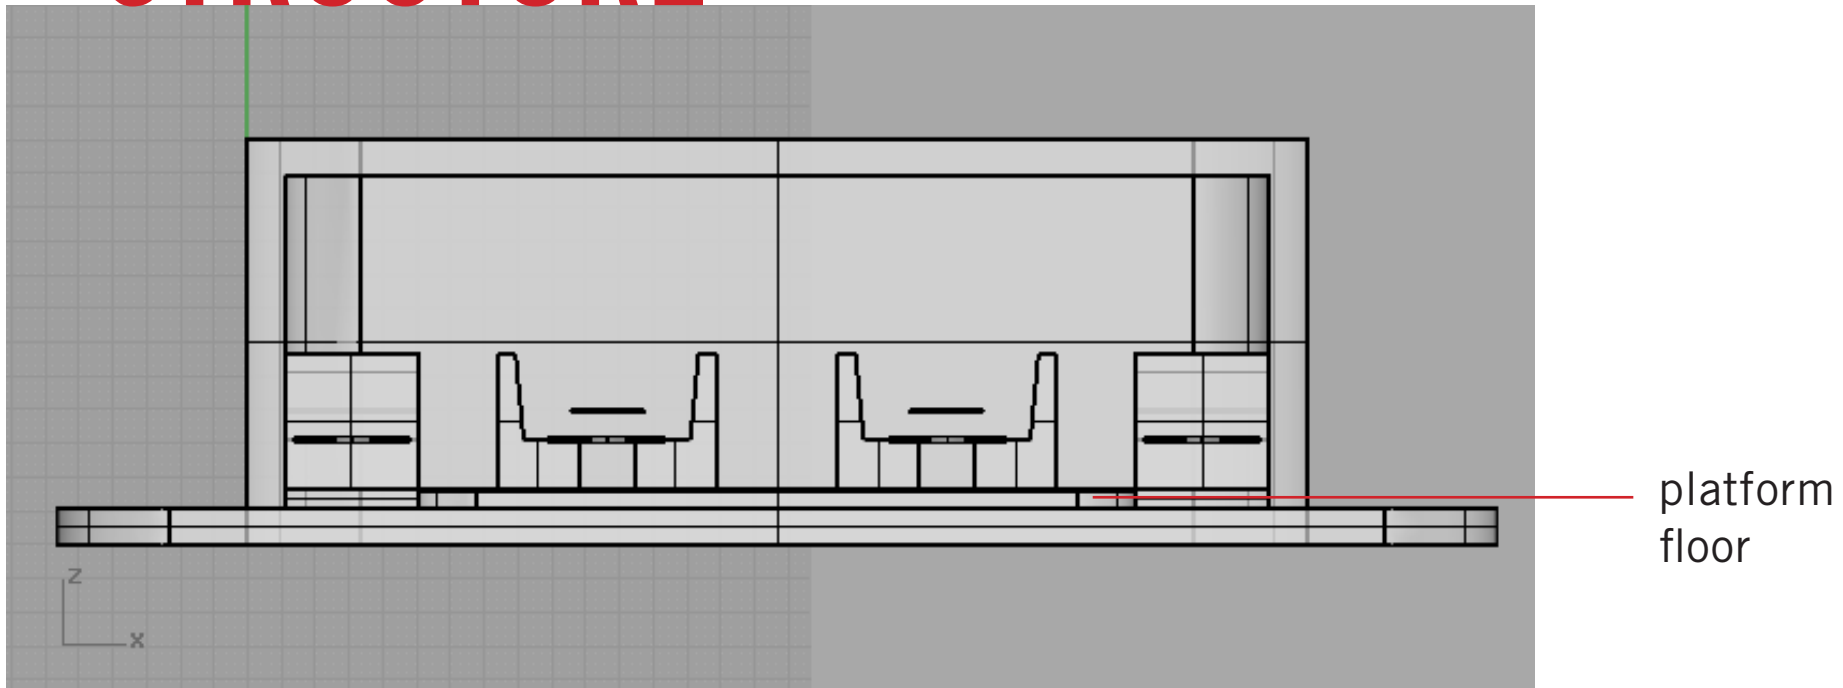

# RISING BOOTHS

Using platform as a way to divide space for more of an intimate dining experience.

# MODEL RENDERING

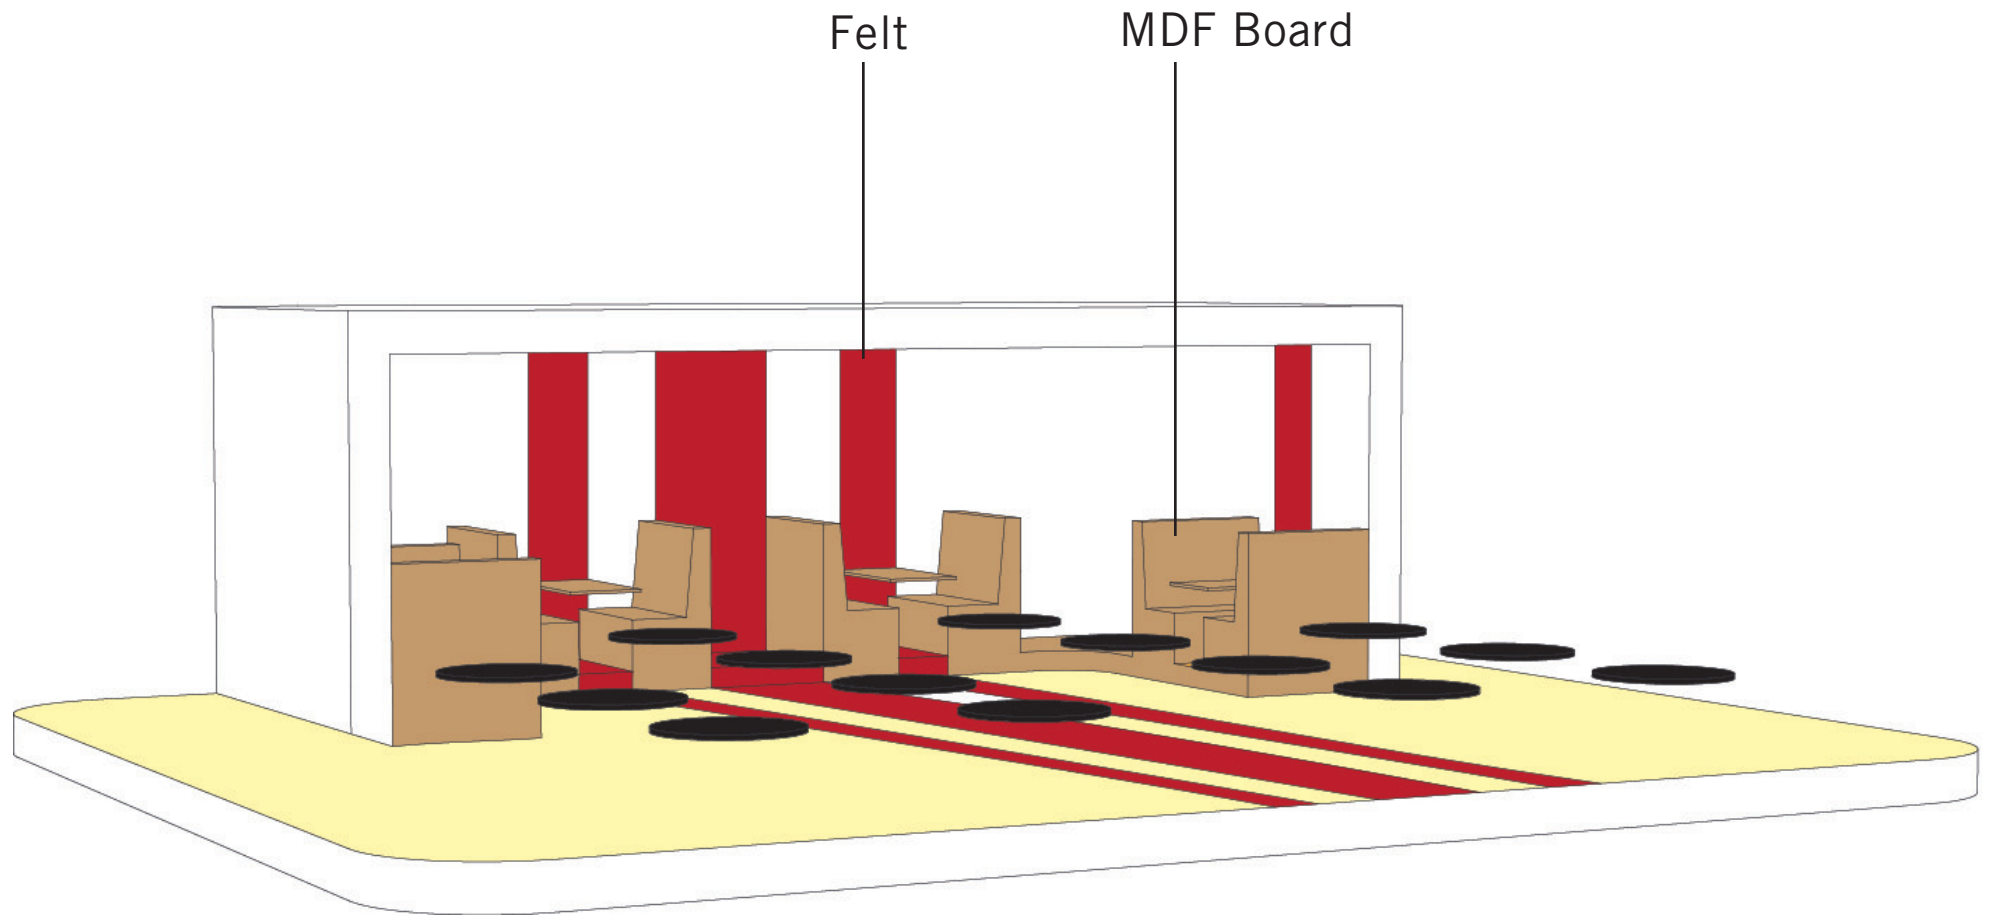

# STRUCTURE

A platform, 7 inches in height, will be installed flushed to the curve of the wall as a foundation for the booths.

— The raise of the platform and installation of the booths provides personal space within the open plan of the cafeteria which are both useful when alone or in the crowd.

# MATERIALS

## MDF board

MDF board is sustainable, cost effective material that is also used in the RISD Fleet Library. The look and colours of wood is most natural and least disturbing to the eyes.

## Felt

Felt is known to be a highly effective sound absorbent material. Cleaning is also very easy with just soap and water.

# ESTIMATED COSTS

<b>MDF BOARD RISERS</b>	\$849.00
<b>MDF BOARD BOOTHS</b>	\$551.85
<b>FILZ FELT</b>	\$6640.00

---

**\$ 8040.85**
